

Kahatex's response to Earthsight's findings

Kahatex has invested considerably to improve the socio-environmental sustainability of our operations. Doing so continues to be a core part of our strategy. We are proud that Kahatex is the only textile company in Indonesia to be awarded the Green Industry Certificate by the Indonesian government.

The sustainability of our cotton sources is also important to us. We procure our cotton through a network of global commodity trading houses.

Together with our supply partners, we purchase considerable quantities of Organic, Better Cotton Initiative (BCI) certified, and Cotton made in Africa (CmiA) certified cotton. We are also audited annually by Netherlands-based Control Union, and are certified to be in conformity with the Global Organic Textile Standard (GOTS) and the Global Recycle Standard (GRS).

Thank you for sharing your findings with us. We will highlight them to our cotton trading partners and work closely with them to improve the socio-environmental sustainability of our cotton supplies.
